

Amsterdam, June 7, 2023 –

The Dead End Gallery in Amsterdam is delighted to announce that a new exhibition will be opening on Saturday, June 24. This exhibit will showcase new works by renowned AI artists, including Irisa Nova, Lily Chen, and Maximillian Hoekstra. As a special addition, an interactive installation titled 'AIIA - Infinite Infusion' by Matthias Oostrik will be on display.

At the Dead End Gallery, we are constantly pushing the boundaries of what is possible with AI in art. Irisa Nova's work, known for her groundbreaking techniques, embodies this quest. Lily Chen, with her unique ability to integrate traditional artistic techniques with modern AI, and Maximillian Hoekstra, whose bold experimental approaches continuously challenge the definition of art, together form an impressive lineup highlighting the diversity and potential of AI art.

In addition, we are particularly pleased to present 'AIIA - Infinite Infusion'. This installation combines AI technology with art to create an infinite fusion of ideas and images. Visitors are invited to participate in the artwork, thereby forging a personal connection with the digital world.

The public opening of the exhibition will take place on Saturday, June 24, from 12:00 to 18:00. The Gallery invites the press to view the new works and meet the artists during an exclusive press moment from June 20 to 23, by appointment.

"We are excited about the opening of this new exhibition and the opportunity to once again display and explore the boundaries of AI in art. We aim to continuously stimulate the discussion about art and technology! We look forward to your arrival and sharing these special works with the public," said Paul Bookelman and Constant Brinkman of the Dead End Gallery.

We warmly welcome you to the opening of the new exhibition on Saturday, June 24 at the Dead End Gallery. Discover the world of AI art and be inspired by the creativity of our visionary artists.

End of press release -
